

## Thermocouple Power Meter, Range Calibrator Models 435B, 11683A

HP 435B

### HP 435B Power Meter

The HP 435B Power Meter is an analog power meter, compatible with the entire series of HP 8480 Power Sensors. Depending on which sensor is used, the HP 435B can measure power from  $-65$  dBm to  $+44$  dBm, full scale, at frequencies from 100 kHz to 50 GHz. This versatile instrument also features  $<1\%$  instrumentation uncertainty, low noise and drift, auto-zero, recorder output, optional battery operation, and long cable options up to 61 m (200 ft).

### HP 11683A Range Calibrator

The HP 11683A Calibrator is specifically designed for use with the HP 435B, 436A and 438A Power Meters. It allows verification of full-scale meter readings on all ranges, as well as meter tracking. Simply connect the cable between the power meter and calibrator. The CAL ADJ control on the power meter is used to set the meter to full scale on the 1 mW range. The calibrator and meter are then stepped through the other ranges verifying accuracy within  $\pm 1\%$  plus noise and drift. The HP 11683A also has a polarity switch which tests the Auto-Zero circuit.
